Volume Contents and Author Index

PERGAMON

Planetary and Space Science

Planetary and Space Science **publishes original articles as well as short communications (letters). Ground-based and space-borne instrumentation and laboratory simulation of solar system processes will be included. The following fields of planetary and solar system research are covered:**

- **celestial mechanics, including dynamical evolution of the solar system, gravitational captures and resonances, relativistic effects, tracking and dynamics**
- **cosmochemistry and origin, including all aspects of the formation and initial physical and chemical evolution of the solar system**
- **exobiology, including origin of life, detection of planetary ecosystems and pre-biological phenomena in the solar system and laboratory simulations**
- **history of planetary and space research**
- **outer planets and satellites, including formation and evolution, remote sensing at all wavelengths and *in situ* measurements**
- **planetary atmospheres, including formation and evolution, circulation *and meteorology, boundary layers,* remote sensing and laboratory simulation**
- **planetary magnetospheres and ionospheres, including origin of *magnetic fields, magnetospheric* plasma and radiation belts, and their interaction with the sun, the *solar wind and satellites***
- **small bodies, dust and rings, including *asteroids, comets and zodiacal* light and their interaction with the solar radiation and the solar wind**
- ***terrestrial planets and satellites,* including the physics of the interiors, geology and morphology of the surfaces, tectonics, mineralogy and dating**

Authors are requested to submit papers to the Editorial Office or one of the Associate Editors.
For addresses, see facing page.

History

Planetary and Space Science is the official organ of the European Geophysical Society Planetary and Solar System Sciences Section.

The paper in this publication meets the minimum requirements of the American National Standard for Information Sciences—Permanence of Paper for Printed Library Materials, ANSI Z39.48–1984.

The Item-fee Code for this publication is: 0032–0633/97 $17.00 + 0.00

Frequency
Published monthly.

Subscription information
Annual Institutional Subscription Rates 1997: Europe, The CIS and Japan 3120.00 Dutch Guilders. All other countries U.S.$ 1925.00. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Dutch Guilder prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.

Any enquiry relating to subscriptions should be sent to:

The Americas: Elsevier Science Customer Support Department, P.O. Box 945, New York, NY 10010, U.S.A. [Tel.: (+1) 212-633-3730 / 1-888 4ES-INFO; Fax: (+1) 212-633-3680; e-mail: usinfo-f@elsevier.com].

Japan: Elsevier Science Customer Support Department, 9–15 Higashi-Azabu 1-chome, Minato-ku, Tokyo 106, Japan [Tel.: (+3) 5561-5033; Fax: (+3) 5561-5047; e-mail: kyf04035@niftyserve.or.jp].

Asia Pacific (*excluding Japan*): Elsevier Science (Singapore) Pte Ltd, No. 1 Temasek Avenue, 17-01 Millenia Tower, Singapore 039192 [Tel.: (+65) 434-3727; Fax: (+65) 337-2230; e-mail: asiainfo@elsevier.com.sg].

Rest of the World: Elsevier Science Customer Service Department, P.O. Box 211, 1001 AE Amsterdam, The Netherlands [Tel.: (+31) 20-485-3757; Fax: (+31) 20-485-3432; e-mail: nlinfo-f@elsevier.nl].

For orders, claims, product enquiries (no manuscript enquiries) please contact the Customer Support Department at the Regional Sales Office nearest to you.

Special prices for members of the EGS:
153 Dutch Guilders including carriage charges. Orders should be addressed to The European Geophysical Society (EGS), P.O. Box 49, D-37189 Katlenburg-Lindau, Germany.

PERIODICALS POSTAGE PAID AT RAHWAY, NEW JERSEY. *Planetary and Space Science* (ISSN 0032–0633) is published monthly, January to December in one volume, by Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K. The annual subscription in the U.S.A. is $1926.00. *Planetary and Space Science* is distributed by Mercury Airfreight International Ltd, 10 Camptown Road, Irvington, New Jersey 07111-1105. *POSTMASTER: Please send address* corrections to *Planetary and Space Science*, c/o Elsevier Science, RSO, Customer Support *Department, 655 Avenue of the Americas,* New York, NY 10010, U.S.A. Special Issue: PLANETARY DATA SYSTEM

Russell, C. T. — **The Planetary Data System** 1

McMahon, S. K. — **Overview of the Planetary Data System** 3

Guinness, E. A., Arvidson, R. E., Slavney, S. — **The Planetary Data System Geosciences Node** 13

Eliason, E. M., LaVoie, S. K., Soderblom, L. A. — **The Imaging Node for the Planetary Data System** 23

Showalter, M. R., Bollinger, K. J., Cuzzi, J. N., Nicholson, P. D. — **The Rings Node for the Planetary Data System** 33

Grayzeck Jr, E. J., A'Hearn, M. F., Raugh, A. C., Sykes, M. V., Davis, D. R., Tholen, D. — **Services of the Small Bodies Node of the Planetary Data System** 47

Walker, R. J., Joy, S. P., King, T. A., Russell, C. T., McPherron, R. L., Kurth, W. S. — **The Planetary Plasma Interactions Node of the Planetary Data System** 55

Acton Jr, C. H. — **Ancillary data services of NASA's Navigation and Ancillary Information Facility** 65

FEBRUARY

Keppler, E., Krupp, N. — **The charge state of helium in the Jovian magnetosphere: a possible method to determine it** 71

Capria, M. T., De Sanctis, M. C., Barucci, M. A., Fulchignoni, M. — **Fourier analysis of the lightcurves of 53 known pole asteroids** 77

Blanco, C., Di Martino, M., Dotto, E., Gilmore, A. C., Kilmartin, P. M., Riccioli, D. — **Earth-bound observations of asteroid 19 Fortuna as support to HST imaging: lightcurves, pole direction and shape** 87

Blanco, C., Di Martino, M., De Sanctis, G., Riccioli, D. — ***Lightcurves, pole direction and shape of asteroids 121 Hermione, 150 Nuwa, 236 Honoria, 287 Nephthys and 377 Campania*** 93

Harwood, N. M., Swinerd, G. G. — **Determination of ocean tidal parameters from the long-period analysis of the orbit of *Starlette*** 107

Trotignon, J. G., Grard, R., Barabash, S., Lundin, R., Dubinin, E. — **Solar wind measurements near Mars and their implication in the Red Planet environment** 117

Reddy, R. V., Lakhina, G. S., Verheest, F., Meuris, P. — **Alfvén modes in dusty cometary and planetary plasmas** 129

Bharuthram, R., Pather, T. — **The kinetic dust-acoustic instability in a magnetized dusty plasma 137**

Huggle, D., Blinov, A., Stan-Sion, C., Korschinek, G., Scheffel, C., Massonet, S., Zerle, L., Beer, J., Parrat, Y., Gaeggeler, H., Hajdas, W., Nolte, E. — **Production of cosmogenic ^{36}Cl on atmospheric argon 147**

Drolias, B., Quenby, J. J., Witcombe, A., Korth, A., Keppler, E., Blake, J. B. — **Numerical simulations of non-adiabatic particle motions in the Jovian magnetosphere; comparisons with *Ulysses* observations 153**

Williams, P. F. B. — **OH rotational temperatures at Davis, Antarctica, via scanning spectrometer 163**

Harrison, I. K., Swinerd, G. G. — **A free molecule aerodynamic investigation using multiple satellite analysis 171**

MARCH

Angeli, C. A., Barucci, M. A. — ***CCD* observations: rotational properties of 13 small asteroids 181**

Collier, M. R., Lepping, R. P. — **Jovian magnetopause breathing 187**

Louarn, P., Le Quéau, D. — **Generation of the Auroral Kilometric Radiation in plasma cavities—I. *Experimental study* 199**

Louarn, P., Le Quéau, D. — **Generation of the Auroral Kilometric Radiation in plasma cavities—II. The cyclotron maser instability in small size sources 211**

Cordier, S., Girard, L. — ***Hyperbolicity analysis of multimoment plasma models: application* to auroral plasma outflows along magnetic field lines 225**

Barkan, A., D'Angelo, N., Merlino, R. L. — **Experiments on ion-acoustic waves in dusty plasmas 239**

Murawski, K., Steinolfson, R. S. — **Numerical modeling of the solar wind interaction with Venus 243**

Murawski, K., DeVore, C. R., Parhi, S., Goossens, M. — **Numerical simulations of MHD wave excitation in bounded plasma *slabs* 253**

Pugacheva, G. I., Gusev, A. A., Martin, I. M., Spjeldvik, W. N., Turtelli Jr, A. — ***On the chaos and stability problem in the trapping of anomalous* cosmic ray heavy ions by the Earth's magnetosphere 267**

FAST TRACK

Samarasinha, N. H., Mueller, B. E. A., Belton, M. J. S. — **Comments on the rotational state and non-gravitational forces of comet 46P/Wirtanen 275**

Ball, A. J., Solomon, C. J., Zarnecki, J. C. — ***A Compton Backscatter Densitometer for the RoLand Comet* Lander—design concept and Monte Carlo simulations 283**

APRIL

Tde Almeida, A. A. — Photoelectric photometry of comet Kohoutek (1973 XII=C/1973 E1): the production rates of CN, C_2, and solid refractory particles typical of dynamically new comets 295

Khanna, M., Sharma, S. D. — Angular domains in cometary capture and anisotropy 305

Rosswog, S., Trautmann, D. — Numerical stability analysis around L_4 in the post-Newtonian restricted three-body problem 313

Drolshagen, G., McDonnell, J. A. M., Stevenson, T. J., Deshpande, S., Kay, L., Tanner, W. G., Mandeville, J. C., Carey, W. C., Maag, C. R., Griffiths, A. D., Shrine, N. G., Aceti, R. — Optical survey of micrometeoroid and space debris impact features on EURECA 317

Staines, K., Balogh, A., Cowley, S. W. H., Edwards, T. M., Forsyth, R. J., Hynds, R. J., Laxton, N. F. — *An overview of the anisotropy telescope observations of MeV* ions during the Ulysses Jupiter encounter 341

Edwards, T. M., Balogh, A., Cowley, S. W. H., Erdos, G., Ferrando, P., Forsyth, R. J., Hynds, R. J., Rastoin, C., Raviart, A., Staines, K. — *Energetic ion and electron observations at Jupiter's dayside* magnetopause: implications for magnetopause location and boundary coupling processes 371

Fainshtein, V. G., Kaigorodov, A. P. — An investigation of magnetic fields of solar wind transient disturbances at $R = 1$ AU and determination of their solar sources 387

Verkhoglyadova, O. P. — *Paraboloidal model for formation of plasma envelopes and ray* structures in the cometary ionosphere 407

MAY

Contarini, G., Barbieri, C., Corrain, G., Cremonese, G., Vio, R. — Spectroscopic observations of the sodium atmosphere of the Moon 417

Harwood, N. M., Swinerd, G. G. — Tesseral harmonics of 13th order from the analysis of satellite orbits at resonance 421

Tomasella, L., Marzari, F., Vanzani, V. — Evolution of the Earth obliquity after the tidal expansion of the *Moon orbit* 427

Fernández, J. A., Ip, W.-H. — Orbital expansion and resonant trapping during the late accretion stages of the outer planets 431

Wilson, R. M. — *On the relationship between transit velocity of interplanetary* shocks and solar active processes 441

Chow, V. W., Rosenberg, M. — A note on the electrostatic ion cyclotron instability in dusty plasmas: comparison with experiment 465

Shukla, P. K., Rahman, H. U. — Low-frequency electromagnetic waves in nonuniform gravitating dusty magnetoplasmas 469

Garcia, H. A. — Energetic electron pitch angle distribution parameters at 6.6R_e, as deduced from GOES X-ray observations 473

Das, G. C., Duorah, S., Singh, S. S., Uberoi, C. — Some aspects of the solitary waves in a relativistic inhomogeneous plasma 485

Wilck, M., Mann, I. — Radiation pressure forces on "typical" interplanetary dust grains 493

Abada-Simon, M. — Comparison of the observational data on flare stars, solar and planetary radio emissions 501

JUNE

Roos-Serote, M., Coupé, V., Drossart, P., Lellouch, E., Saint-Pé, O., Encrenaz, Th. — Infrared imaging of Venus from IRTF/ProtoCAM observations in 1991 509

Bogdanov, A., Sauer, K., Baumgärtel, K., Srivastava, K. — Plasma structures at weakly outgassing comets—results from bi-ion fluid analysis 519

Despois, D., Biver, N., Bockelée-Morvan, D., Colom, P., Crovisier, J., Paubert, G. — Radio line observations of comet 109P/Swift–Tuttle at IRAM 529

Möhlmann, D. — Cometary activity and nucleus modelling: a new approach 541

Söding, A., Glassmeier, K.-H., Fuselier, S. A., Neubauer, F. M., Tsurutani, B. T. — Comparison of the wave energy transport at comets p/Halley and p/Giacobini–Zinner 547

Birlan, M., Barucci, M. A., Angeli, C. A., Doressoundiram, A., De Sanctis, M. C. — Rotational properties of asteroids: CCD observations of nine small asteroids 555

Hockey, T. A. — The search for historical impact sites on Jupiter 559

Bespalov, P. A. — Self-consistent model of clock event in outer Jovian electron radiation belts 565

Hutzell, W. T. — Analytical axisymmetric circulations for atmospheric transport studies 569

Griv, E. — Resonant excitation of density waves in Saturn's rings 579

Baumgärtel, K., Sauer, K., Bogdanov, A., Dubinin, E., Dougherty, M. — "Phobos events": signatures of solar wind dust interaction 589

Zhou, H. — *Whistler waves generation and current closure by a pulsed tether* in ionospheric plasmas 603

Métris, G., Vokrouhlický, D. — Thermal force perturbations of the LAGEOS orbit: the albedo *radiation part* 611

JULY

Special Issue: COMET NUCLEUS MODELLING

Schulz, R., Schwehm, G. — *46P/Wirtanen: necessary observations in support of ROSETTA* 619

Grothues, H.-G. — Photometry and direct imaging of comet P/Faye 1991 XXI 625

Klinger, J., Levasseur-Regourd, A.-C., Bouziani, N., Enzian, A. — Towards a model of cometary nuclei for engineering studies for future space missions to comets 637

Podolak, M., Prialnik, D. — Models of the structure and evolution of comet P/Wirtanen 655

Benkhoff, J., Boice, D. C. — *Modeling the thermal properties and the gas flux from a porous,* ice–dust body in the orbit of P/Wirtanen 665

Kömle, N. I., Kargl, G., Thiel, K., *Seiferlin, K.* — Thermal properties of cometary ices and sublimation residua *including organics* 675

Seiferlin, K., Kömle, N. I., Kargl, G., Spohn, T. — *Line heat-source measurements of the thermal conductivity of* porous H_2O ice, CO_2 ice and mineral powders under space conditions 691

Hughes, D. W. — The interior of a cometary nucleus 705

Jenniskens, P., Blake, D. F. — A mechanism for forming deep cracks in comets 711

Sauer, K., Bogdanov, A., *Baumgärtel, K., Dubinin, E.* — Plasma environment of comet Wirtanen during its low-activity *stage* 715

Möhlmann, D. — *Origin of comets in the extended preplanetary disk* 731

AUGUST

Cosmovici, C. B., Montebugnoli, S., Orfei, A., Pogrebenko, S., Colom, P. — First evidence of planetary water maser emission induced by the comet/Jupiter catastrophic impact 735

McKay, C. P. — Elemental composition, solubility, and optical properties of Titan's organic haze 741

Mège, D., Masson, P. — Amounts of crustal stretching in Valles Marineris, Mars 749

Belskaya, I. N., Lagerkvist, C.-I. — Physical properties of M class asteroids 783

Letter
Israelevich, P. L. — Comment on "A simple test of the induced nature of the Martian tail" by C. T. Russell *et al.* 795

Special Section: EVOLUTION AND STATE OF SURFACES, CRUSTS AND LITHOSPHERES OF PLANETARY BODIES

Janle, P., Basilevsky, A. T., Raitala, J. — **Preface 799**

Komatsu, G., Baker, V. R. — **Channels in the Solar System 801**
